TECHNICAL SKILLS

FRONTEND DEVELOPMENT

- React
- TypeScript
- JavaScript (ES6+)
- HTML5 & CSS3
- Storybook

TESTING & QUALITY

- React Testing Library
- Vitest
- Cypress

BACKEND, DATA & ANALYTICS

- Node.js
- Java, Kotlin (basic)
- SQL
- Data Analysis & Visualization (Looker)
- Airflow (DAGs), ETL / data pipelines

DEVOPS / PLATFORM :

- Git, Github, Bitbucket
- CI/CD (Github Actions, Bamboo)
- Docker, Podman, Insomnia
- Google Cloud Platform (BigQuery, GCS, Composer/Airflow)
- Monitoring & observability, incident & change management
- SLA / SLO tracking, capacity planning, performance forecasting

TOOLS & COLLABORATION

- Jira
- Figma (basic)
- Technical documentation & onboarding

EDUCATION

ADAM MICKIEWICZ UNIVERSITY IN POZNAŃ

HISTORY 2008-2014

LANGUAGES

- Polish - Native
- English - C1
- Spanish - A1/A2

HOBBY

- Cycling & sailing
- Miniature Painting
- Board and video games

GALLUP STRENGTHS (TOP 5)

Activator • Developer • Individualization • Empathy • Woo

ABOUT ME

I am a Front-end & Platform Engineer with experience in React/TypeScript and a strong background in service reliability and data-driven operational processes. I build user-facing features, internal tooling, CI/CD workflows and automate data pipelines (BigQuery, Looker, Airflow). I also support the developer community as a co-organizer of MeetJS Poznań and internal tech events.

Outside of work, I develop personal side projects — including game-related tools — to deepen my skills. I also contributed to e.g. the Material UI during an open-source hackathon.

WORK EXPERIENCE

JUNIOR FRONT-END SOFTWARE ENGINEER

Allegro.pl sp. z o.o., Poznań

2022-03 - NOW

- Developed user-facing features in Allegro CMS and marketplace tools using React, TypeScript and MUI, used daily by marketplace sellers.
- Built accessible, responsive UIs aligned with UI/UX best practices and internal design system (Storybook, reusable components).
- Maintained and improved test coverage with React Testing Library, Vitest and Cypress; participated in code reviews and testing culture.
- Implemented backend changes in Java/Kotlin and Node.js (new or extended endpoints, configuration changes, authorization, SQL queries).
- Handled on-call duties for core Allegro services: debugging production issues under time pressure, working with monitoring/alerts and coordinating hotfix deployments.
- Contributed to CI/CD and workflow improvements (GitHub workflows, PR validation, audit/security checks) to streamline engineering processes.

SITE RELIABILITY SPECIALIST

Allegro.pl sp. z o.o., Poznań

2019-04 - 2022-03

- Led capacity management for key Allegro services: analysed traffic vs CPU/storage (Cassandra, PostgreSQL, MongoDB, 5Stor, etc.) and prepared forecasts for peak seasons (e.g. holidays, pandemic).
- Built BigQuery datasets and Looker dashboards for SLAs, Apdex, incident metrics and technical pain points, supporting reporting to management.
- Automated data workflows using Python + Airflow DAGs (scheduling SQL queries, rules and cron-based pipelines), reducing manual reporting work.
- Designed and maintained pain point monitoring (outdated services, unused hosts, old versions, long-running services, missing restarts) to systematically reduce technical debt.
- Co-created and improved incident and change management processes, including crisis communication (chaos management), on-call policies and tooling migration.
- Contributed to tooling for version control governance – enforcing audit and security requirements on pull requests (validation checks, ownership, policy compliance).
- Supported migrations of repositories and CI/CD pipelines from Bamboo/Bitbucket to GitHub and of services to Kubernetes / new communication tools.

PARTNER SUPPORT SPECIALIST

Arvato Bertelsmann/Allegro.pl sp. z o.o., Poznań

2015-06 - 2019-03

- Provided technical and operational support for thousands of marketplace merchants (API integrations, platform compatibility, account configuration).
- Diagnosed issues related to platform integrations and infrastructure and cooperated with engineering teams to resolve incidents.
- Delivered high-quality customer experience and support for thousands of merchants.
